FOREWORD

In presenting our new catalogue we would take the opportunity of referring to certain considerations which have engaged our special attention.

Increasing importance is now being attached to design, and the old assortments of conventional patterns, in which there was no real artistic association, no longer appeals to the critical purchaser.

In the preparation of the designs in this catalogue, we have given our draughtsmen and modellers a free hand, with the result that a marked element of originality appears in a number of the items. At the same time, we have insisted that all designs shall allow of economical manufacture and shall be completely practicable in use.

We have introduced as much diversity in design as is compatible with steady production, and our artists are always at the disposal of our customers in connection with special enquiries. In connection with our well known business in artistic Electric Lighting Fittings, we are constantly in touch with the requirements of the architectural profession, and designs framed on special instructions can be prepared at a few days' notice.

In maintaining a considerable stock we shall enable our customers to rely on speedy despatch of a large proportion of the listed items.

In conclusion, we would venture to ask our friends to look on us not merely as suppliers, but as contributors to the successful and smooth prosecution of their own businesses.

DISCOUNT

50%

**Plus 15%
ADVANCE**

PLEASE NOTE

A careful and full specification of what is required, with particular attention to the following points, will contribute to QUICK DELIVERY.

1. State whether or not fixing screws are required.
2. A "set" of lever handles is a pair complete with escutcheons.
3. A "pair" of lever handles is without escutcheons.
4. State if keyhole is required; if so, give centre to centre measurements.
5. In the case of half sets or half pairs say which hand.
6. In ordering door handles other than the listed sizes, say whether length is between brackets, or overall grip, or overall plate or plates.
7. In ordering lock handles, state centres of keyholes; if ordered as latch handles they will be supplied **without keyholes**.
8. In ordering guard bars, state whether left or right hand doors.

The "Harcourt" Overhead Door Closer and Check

Patent No. 382760, others pending.

The "HARCOURT" Door Closer and Check, though of conventional appearance, has an entirely new and ingenious spring mechanism operating a spring coil in place of the more usual helical spring. It is, however, reversible, i.e., fits either hand of door without alteration to the mechanism or reversing the internal spring.

THE SIZES

Our size	Corresponding size of other makes	Our size	Corresponding size of other makes
A	A For light inside doors (up to 6' 6" by 2' 6").	R	C For heavy inside doors and ordinary outer doors.
P	B For ordinary inside doors (up to 7' by 2' 9" by 1½" to 1¾" finished thickness) and light outer doors.	S	D For large and heavy inside doors and heavy outer doors.
		T	E For large and heavy outer doors.
